

Program Manager

Who We Are.

B3 seeks to advance stewardship of essential natural resources by building data and analytics tools for water-related decisions. We deliver data intelligence focused on water management through an intuitive web-based analysis platform to a diverse set of industries. B3 is a dynamic, full-stack data company, from our proprietary data collection platform to our extensive data management processes and our built-from-the-ground-up platform.

Our Core Values.

We select and evaluate our team members based on aptitude for:

1. Getting the right stuff done (GRSD)
2. Finding a way (analytical and hungry to learn)
3. Taking ownership (accountability)
4. Being professional and humble.

The Role.

The Program Manager is responsible for managing the content and execution of B3's product roadmap, satisfying Product Managers' product requirements while upholding B3's business strategy and goals. In this role, s/he will liaise, coordinate, and communicate between Product Managers, Product Developers, to deliver innovative, high quality, and value-adding products on time and budget.

Responsibilities:

- Coordinate the development of new and existing B3 products (i.e., data, software, analytics).
- Collect, translate, prioritize, and communicate customer and product needs through regular interaction with Product Managers and Product Development team members.
- Ensure all managed projects and product development deliverables, through concept, design, development, and QA/QC, are meticulously established, thoroughly documented, effectively communicated, properly resourced, and rigorously followed to ensure on-time/on-budget completion.
- Develop, maintain, and execute the project master plan and schedule

Qualifications/Skills.

- Degree in an analytical discipline, such as Data Science, Mathematics, Computer/Data Science, Engineering, Business, Geoscience or equivalent experience.
- Minimum 3 years Program or Product Management experience, preferably for software and data products used within the finance/investment or energy industry. Knowledge of energy operations, natural resource characterization/management, and/or sustainability reporting is strongly desired.
- Proficient in Agile management and Lean development techniques.
- Proficiency with SQL preferred; Familiarity with Python, R, and/or MATLAB, standard BI tools, and Microsoft applications are a plus.
- Strong problem-solving and analytical skills.
- Strong organizational skills.
- Thrives in a fast-paced, dynamic, and results-oriented work environment.
- Understands the importance of prioritization, meeting deadlines, and managing expectations.

Location: This role will be based in Denver, CO, but long-term remote options will be considered for highly-qualified candidates.

Interested candidates should send a resume and / or cover letter to careers@b3insight.com with the SUBJECT heading: B3 Program Manager 2022.
